ASSEMBLY INSTRUCTIONS

To start using yudo montessori 3-part cards, just print - in colors - each file on letter size paper and cut by the marks.

PAPER

In order for the cards to last longer, you can print on a heavier weight paper (eg cardstock or cardboard)

If you prefer you can choose to print on plain paper and then paste it on a cardboard or card and then cut

CUT

You will be given the options to cut with a paper knife cutter or scissors / guillotine

For those who prefer scissors or guillotine, there will be a square around the entire area to be cut

For those who prefer the paper knife cutter (and ruler), they will have only a few trim marks to guide themselves

We at yudo montessori prefer the paper knife cutter, as this way we guarantee that the images are clean without lines that escaped the scissors :)

For those who prefer to cut with the paper knife cutter it is recommended not to cut the sheet from end to end, but to the limits of each trim marks

LAMINATE

For greater durability of the cards, after cutting them you can laminate with transparent adhesive film or use hot laminating machine

Finally, you can round the corners with scissors or round corner machine
