Earth

YUDO

YUDO

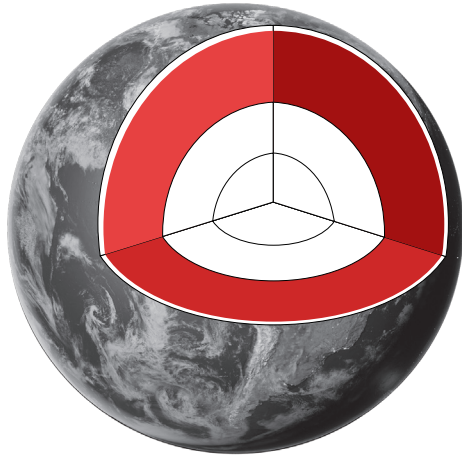

The **Earth**
is the third planet from the Sun.
It is the only planet we know
that has water, air, and life.

YUDO

The **crust** is the outermost and thinnest layer of the Earth. It is where continents, oceans, and mountains are found. It is where we walk every day.

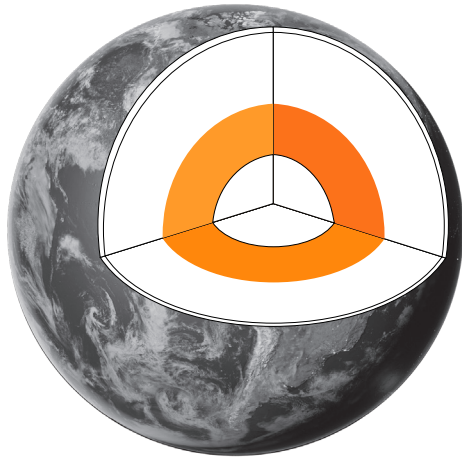

YUDO

YUDO

The **mantle** is the layer below the crust. It is made of very hot and thick rocks. The heat from the mantle helps move the crust's plates.

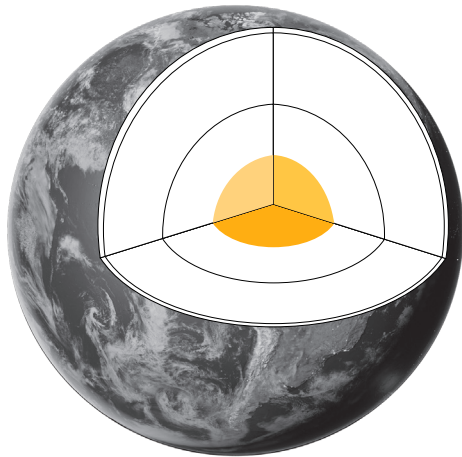

YUDO

YUDO

The **outer core** is found below the mantle. It is made of hot metal, mainly iron and nickel. This metal is liquid and helps create Earth's magnetic field.

YUDO

YUDO

The **inner core** is found at the center of the Earth. It is made of very hot iron and nickel. Even though it is very hot, it is solid because of the enormous pressure.
