Tree

YUDO

YUDO

A tree

is a plant that produces wood and can grow very tall. It is made up of roots, a trunk, branches, and leaves.

YUDO

YUDO

The *branches*

grow from the trunk and support the leaves, flowers, and fruits. They also help spread the tree's canopy, capturing sunlight more efficiently.

YUDO

YUDO

The *trunk*

is the main woody part of the tree. It helps the tree reach the necessary height to receive sunlight. It connects the branches to the roots, providing structural support for the canopy.

YUDO

YUDO

The *leaves*
grow on the branches. They have
veins and produce food for the tree
using sunlight.

YUDO

YUDO

The *root*
is the part of the plant that is
underground. It absorbs water
and minerals to feed the tree and
keeps it firmly anchored in the
ground.
