please...

support this project and don't contribute to the theft of intellectual property by sharing this file.

The materials you've purchased are for your personal use only, whether you're a parent using them for activities at home, or a teacher using them in a classroom.

Please don't share the documents with others and instead direct them to our online shop www.yudomontessori.com to purchase their own set.
Please review the terms of use included at the end of the document.

Thank you for your cooperation.

welcome!
it's great to have you here.

I am Flávia, a mother and designer deeply curious about the Montessori methodology.

Creating these materials for my daughter has been an incredible journey, especially after the challenging year of 2020. It is my pleasure to share these with you, made with love.

I take pride in crafting these printables in collaboration with a **Montessori guide 3-6**. As a designer, I strive to create visually appealing cards that adhere to and enhance the Montessori principles applied in these materials.

I have also been involved in two Montessori projects in the past – the [Portuguese Society of Montessori Education \(SPEM\)](#) and the [Portuguese Montessori Institute](#) – aiming to educate and bring this methodology to everyone.

As I create these materials, I am constantly discovering and rediscovering the beauty and wonder of the world alongside my daughter.

Please don't hesitate to reach out if you have any questions or special requests, like materials in another language. I would love to help!

assembly instructions

To start using yudo montessori printables, print - in colors - each file on letter-size paper or A4 paper and cut by the marks

paper

For the materials to last longer, you can print on a heavier-weight paper (e.g., cardstock or cardboard).

If you prefer, you can choose to print on plain paper and then paste it onto cardboard or a card and then cut.

cut

You will be given the option to cut with a paper-knife cutter or scissors.

For those who prefer scissors or guillotine, there will be a square around the entire area to be cut.

Those who prefer the paper-knife cutter (and ruler) will have only a few trim marks to guide themselves.

We at yudo montessori prefer the paper-knife cutter, as this way, we guarantee that the images are clean without lines that escaped the scissors :)

For those who prefer to cut with the paper-knife cutter, it is recommended not to cut the sheet from end to end, but the limits of each trim mark.

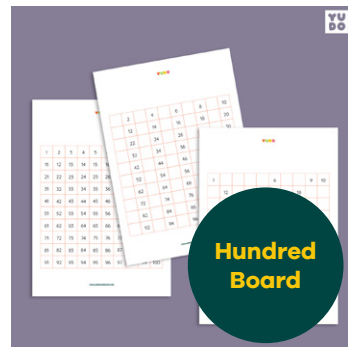

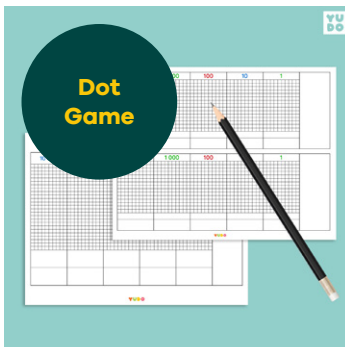

laminate

For greater durability of the cards, you can laminate them with transparent adhesive film or use a hot laminating machine after cutting them.

corners (optional)

You can round the corners with scissors or a round corner machine.
